

LEZYNE CNC TRAVEL FLOOR DRIVE PUMP

> £79.99

Upgradebikes.co.uk

A good pump goes a long way in any travelling triathlete's tool arsenal, and that's what Lezyne have addressed with their Travel Floor Drive pump. It has the two most important features when it comes to a travel tool; it's more compact than a regular floor pump and more durable than most. The Travel Floor Drive is 51cm tall, 19cm wide and 7cm broad, which makes it easy to stash in a travel case, yet remains big enough to be useable and easily inflate a tyre without too much effort. The Travel Floor Drive will inflate to 160psi/11bar so there are no issues with top end inflation. This pump is made from CNC machined aluminium and all the parts are replaceable. The head chuck works on both Presta and Schrader valves and with the included Speed Chuck this pump is compatible with disc wheels. The 3.8cm diameter pressure gauge is easy to read and the single foot stand is more than enough to keep the Travel Floor Drive stable as you inflate. The trade off of all these great features is the weight (862g), but this is lighter than many standard sized floor pumps. It's hard not to admire the sleek and neat design. Unfortunately, it doesn't come cheap, but it will outlast cheaper pumps making it more economical in the long term.
