**The Lezyne pump is a work of art. It's CNC-machined from aluminium and anodised in a choice of colours – blue, black, red or gold. Its build quality surpasses that of most other hand pumps out there and it weighs in at a paltry 128g.**

We inflated our tyres way quicker with this than with other pumps and the action is a lot more forgiving on your hands. We've mangled many valves using pumps that attach directly, so the reversible Presta/Schrader hose system is a real godsend.

The Pen Gauge hose replacement gives you the opportunity to get your pressure right out on the trail. It's easy to read too – a great addition that's worth the extra dosh.
