LEZYNE ALLOY FLOOR DRIVE

£59.99 ▶ This excellent pump is a joy to use

STROKES TO 100PSI 23

Lezyne really delivers with this classic pump. It has a superbly reassuring feel, aided by its comfortable varnished wooden handle, while the CNC-machined base and 15mm shaft make it very stable and the gauge is clear to read. Add in a long hose and great build quality and you've got a more than competent pump, but what really makes it is Lezyne's excellent Flip-Thread chuck. This does away with a locking lever, the reversible head screwing directly – and very securely – onto Presta valves for leak-free pumping every time. Slightly slower to attach, but worth it, and it makes bent Presta valves a thing of the past. Comes in four colours. www.upgradebikes.co.uk

HIGHS Screw-on head, wood handle

CYCLING RATING

WE SAY...

Lezyne brings its typical elegance, efficiency and styling to this design

LEZYNE ALLOY FLOOR DRIVE

THE VERDICT

WINNER > LEZYNE ALLOY FLOOR DRIVE A balance between form and function

The Lezyne Alloy FD takes top honours for its balance of design, efficiency and performance

LEZYNE ALLOY FLOOR DRIVE. It's a straightforward, very well made design, with a superb wooden handle, a long hose and a very stable base – but it's Lezyne's Flip-Thread chuck that we really like. The screw-on design provides a fantastic seal and can be used on valves where only small amounts of thread are showing. It's flippable for

Schrader valves plus has an extra screw-on head that pushes on to valves in the more usual way. For its balance of design, efficiency and pumping performance it takes the top honours.
