

LEZYNE **ALLOY DRIVE S**

Upgrade Bikes www.upgradebikes.co.uk

So Good... This compact number from Lezyne is only 190cm long, and carrying it isn't a burden thanks to its minimal 115g weight.

It's well built and is capable of taking a knock or two. The hose enables more manoeuvrability, and stows away neatly within the pump's handle. The seal between the valve and hose is great and inflation is extremely efficient, considering the size. The pump can handle high pressures or volumes with ease.

No Good... It would be nice if the heads of the hose rotated independently rather than having to rotate the pump when attaching.

**Mountain
Biking** UK

A great little number that's sturdy, lightweight and deals with the job in hand well
