

LEZYNE HP DRIVE

► **WHAT THEY SAY:** Pressure Drive is a lightweight hand pump for high-pressure tyres, with an integrated ABS flex hose.

► **WHAT WE SAY:** Coming in just a couple of millimetres over our 230mm length, thanks to its protective bungs, Lezyne offers a shrunk-down version of the

traditional frame pump complete with reversible ABS hose that works for Schrader and Presta valves alike, it even has a bleed valve but lacks a gauge. Maximum specified pressure is 120PSI, whilst our 80 stroke test took us to 48PSI, the second best here, and that easy to achieve thanks to threaded adaptor giving an excellent seal.

VERDICT

A top performance whilst the rounded composite matrix handle makes it comfortable too.
