TRACK PUMPS

LEZYNE CNC DIGITAL DRIVE

★★★★★ £110

This had the most consistently accurate gauge here, has a long braided hose and the screw-on ABS-1 HP head, while slower than a thumb-lock, proved very secure on the valve. We're not sure you'll ever hit the 350psi max, especially as this took a slightly sluggish 35-36 strokes to hit 100psi, but it's well made and all the parts are replaceable.
